Well Travelled Roads

To Our Place

Being a family business...

and being 100% Australian owned, means a lot more at Spectrum Floors than loose historical claims.

It means that every client is guaranteed access to at least two generations of contract flooring technical expertise at any one time.

It means a true and unbreakable commitment to maintain a viable, innovative company that will do everything to ensure customers come back again and again.

And it means that you're dealing with the same people at head office year after year – not just a rep whose loyalty may be to the next 'better' job.

Expertise tailored to **your** requirements

Spectrum has more than 20 years of experience in the successful planning and delivery of superior floors and accessories.

From entry mats to catch the dirt to finishing trims, Spectrum floors are standing... and standing... the test of time for educational, healthcare, commercial and public buildings... from airports to zoos.

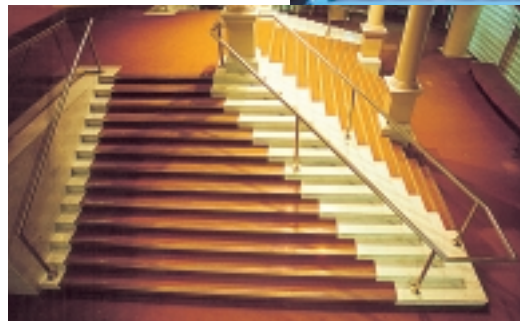

The Best – This Way!

We constantly search the world...

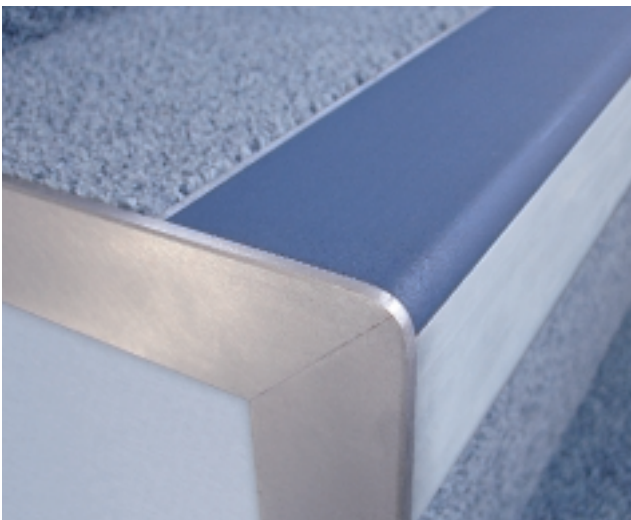

for the absolute best flooring products and accessories. Every project is considered unique and so there can never be a generic solution to your needs.

We're also always searching for advances and developments in environmentally friendly products and accessories to ensure an ever-increasing obligation to green star standards.

We import specific products directly into Australia and then only after testing and certification to relevant industry standards.

Miles Of Smiles

Sustainability...

is the core of Spectrum Floors' quality and service philosophy.

It's not just about supplying the perfect low-maintenance, environmentally-friendly flooring solution for educational, healthcare, commercial, residential and many other buildings Australia-wide.

It's about recommending and supplying the best adhesives and providing a total maintenance package (including ecological cleaning products) that will see Spectrum ahead of the field.
