ABOUT SPECTRUM

As a 100% Australian owned family business we are proud of our strong values that underpin our work and customer service.

Our work ethic is based on reliability, honesty, integrity and urgency; we deliver what we promise.

Over 40 years of experience in the commercial flooring industry means that our clients can access at least two generations of technical expertise in contract flooring at any one time. It means a consistent point of contact that is dedicated to delivering the best customer service.

Our values and experience are the foundation for maintaining a sustainable, innovative company that is dedicated to excellent customer service and quality products.

Our website offers a wealth of product information, inspiration and project examples and convenient sample ordering online:

www.spectrumfloors.com.au

We are an approved Australian Trusted Trader and are ISO and AS/NZS certified.

OUR COMMITMENT TO THE ENVIRONMENT

Spectrum Floors offer superior flooring products and accessories that are designed and manufactured in Europe or custom made locally in Australia. Our products are stronger and longer lasting and give you piece of mind when specifying flooring for your next commercial project.

Our products are available in the latest contemporary designs, adhere to general standards and come with warranties and certifications.

Our quality rubber flooring products are certified by Good Environmental Choice Australia (GECA). When a product is certified against GECA's Floor Coverings standard, consumers can be sure that the product has been assessed to meet environmental, human health and ethical impact criteria.

Other certifications for our quality flooring include Cradle to Cradle (Cradle to Cradle Certified® is a globally recognised measure of safer, more sustainable products made for the circular economy), Greenguard (Gold standard, meaning emission limits meet and exceed CDPH Standard Method), LEED (Leadership in Energy and Environmental Design is an internationally recognised green building certification system), Blauer Engel (The Blue Angel is Germany's ecolabel and sets high standards for environmentally friendly product design).

Supplying environmentally friendly and sustainable products is what we are most proud of. And we constantly search for advances and product developments to meet the every-increasing obligations to Green Star standards (by Green Building Council of Australia (GBCA)).

It is this dedication to quality products that are environmentally friendly and sustainable that sets us apart and delivers results for our clients and their projects that stand the test of times.

SUSTAINABLE RUBBER FLOORING

Rubber flooring offers quietness, resilience and comfort. It's ideal for education, healthcare, hospitality, heavy commercial and sports environments. With an extensive choice of colours, textures and patterns, our rubber flooring is GECA certified and meets or exceeds ISO, EN standards to ensure high quality.

Our Plan/Sheet System flooring range features a surface treatment that protects the surface, improves performance and reduces the need for cleaning and maintenance.

Our Stud System range, based on the original Pirelli design, offers a wide chromatic and typological range satisfying different application needs, starting from the small project to high traffic areas.

Rubber is an alternative to vinyl and other resilient finishes.

Benefits of our premium certified rubber flooring:

- Offering quietness, resilience, and comfort – ideal for healthcare, hospitality, heavy commercial and sports environments
- Our rubber flooring has no formaldehyde, extremely low emissions, no plasticizers (carcinogenic, a more unstable component) or heavy metals (persistent bio accumulative toxic chemicals)
- Our Plan/Sheet System rubber flooring range features a surface treatment that protects the surface, improves performance, and reduces cleaning and maintenance

BIO21 INSTITUTE AT THE UNIVERSITY OF MELBOURNE

When Flooring Needs To Be Resistant To Liquid Nitrogen

Project Location: Melbourne, VIC

Client: University of Melbourne

Architect: Architectus, Melbourne

Spectrum Products Used: Spectrum Uni Rubber Flooring

Spectrum's contract rubber flooring was selected for the new purpose built Bio21 Institute of Molecular Science and Biotechnology, abbreviated as the Bio21 Institute at the University of Melbourne.

Spectrum's Rubber flooring had to meet PC2 laboratory requirements and needed to be resistant to liquid nitrogen (a freezing agent) that is constantly used in the laboratory.

The rubber flooring is outperforming the laboratory staff's expectations for durability and performance given the challenging requirements.

CBA SYDNEY

The Best Spaces, Tools And Techniques To Bring New Ideas To Life

Project location: Sydney, NSW

Client: Commonwealth Bank of Australia

Architect: Woods Bagot, Sydney

Spectrum Products Used: Spectrum Kayar Rubber Flooring

Spectrum rubber flooring and entrance matting was selected for this innovative project in Sydney. The stunning ground floor not only showcases our product's exceptional aesthetics, but also the acoustic benefits of rubber.

With extremely low VOC's (volatile organic compounds) our GECA certified rubber flooring offered this project better indoor air quality, leading to a healthier and happier space.

GUNNGALIN OFFICES

High Environmental Standard Rubber Flooring

Project Location: Canberra, ACT

Client: ACT Government

Architect: Peckvonhartel, Canberra

Spectrum Products Used: Spectrum XT Stair Edging and Grain Rubber Flooring

Accommodating about 650 ACT Government staff, the office block has been built to a high environmental standard targeting a minimum 4.5 star NABERS rating and provide A-Grade standard accommodation.

An ACT Government shopfront, child care centre with about 90 places, and cafe occupy the ground floor. An ideal project for Spectrum Grain rubber flooring with its GECA Certification and superior grip and comfort.

Winyu House is a building made for people. The building sets a new benchmark in office accommodation providing a exemplary working environment that provides productivity and efficiency promoting Connectivity, Collaboration, Community.

Gungahlin State Offices - Canberra - Spectrum XT Stair Edging and Grain Rubber Flooring

BURGMAN ELC

Flooring To Create A Home-Away-From-Home Atmosphere

Project Location: Canberra, ACT

Client: Burgman ELC

Architect: Cox Architecture, Canberra

Spectrum Products Used: Spectrum Kayar Rubber Flooring

Designed to incorporate indoor/outdoor connections, rhythm and movement, warmth, and flexibility the Burgman Early Learning Centre in Canberra is an ideal place to encourage children to learn through experience.

The Centre's design is driven by the pedagogical strategy that a child's environment is fundamental to their development, a concept based on the Reggio Emilia education philosophy.

Spectrum Kayar rubber flooring was used to create a home-away-from-home atmosphere, using soft tones to compliment the light-coloured wood.

Cox Architecture employed a design approach based on enabling and supporting curiosity and creativity with an emphasis on natural materials such as rubber flooring.

THE HEIGHTS SCHOOL

STEM Focused Classrooms

Project Location: Modbury, SA

Client: Heights High School

Architect: Thomson Rossi, Adelaide

Spectrum Products Used: Spectrum Grain Rubber Flooring

Spectrum Rubber was chosen for this exciting project at Heights High School as part of their recent STEM building program.

Architects Thomson Rossi created an interesting space with clarity of design featuring inlay colours and patterns while at the same time providing acoustic and comfort underfoot qualities.

Spectrum Rubber was chosen for its dimensional stability, meaning the joints could be tight, neat, sharp, offering a functional, resilient, and inspiring learning area.

ARCHITECTURAL ENTRANCE MATTING

Designed to trap dirt and moisture effectively, our range of matting options include Australian made anodised aluminium and rubber inserts. Custom shapes and sizes made to order are also available.

Entrance mats increase the life of your floor and reduce cleaning costs. Daily pedestrian traffic will inevitably result in dirt marks and floor stains. This increases cleaning and maintenance costs and causes wear and damage which may incur costs for replacements. Pedestrian safety issues caused by wear or damaged flooring can lead to building-owner liability. This risk that can be managed with appropriate entrance matting.

Our aluminium non slip entry mats consist of extruded aluminium tread rails that carry factory installed infill. We can provide rubber infill mats for slip resistance, as well as secondary/dirt barrier matting for improved dirt control.

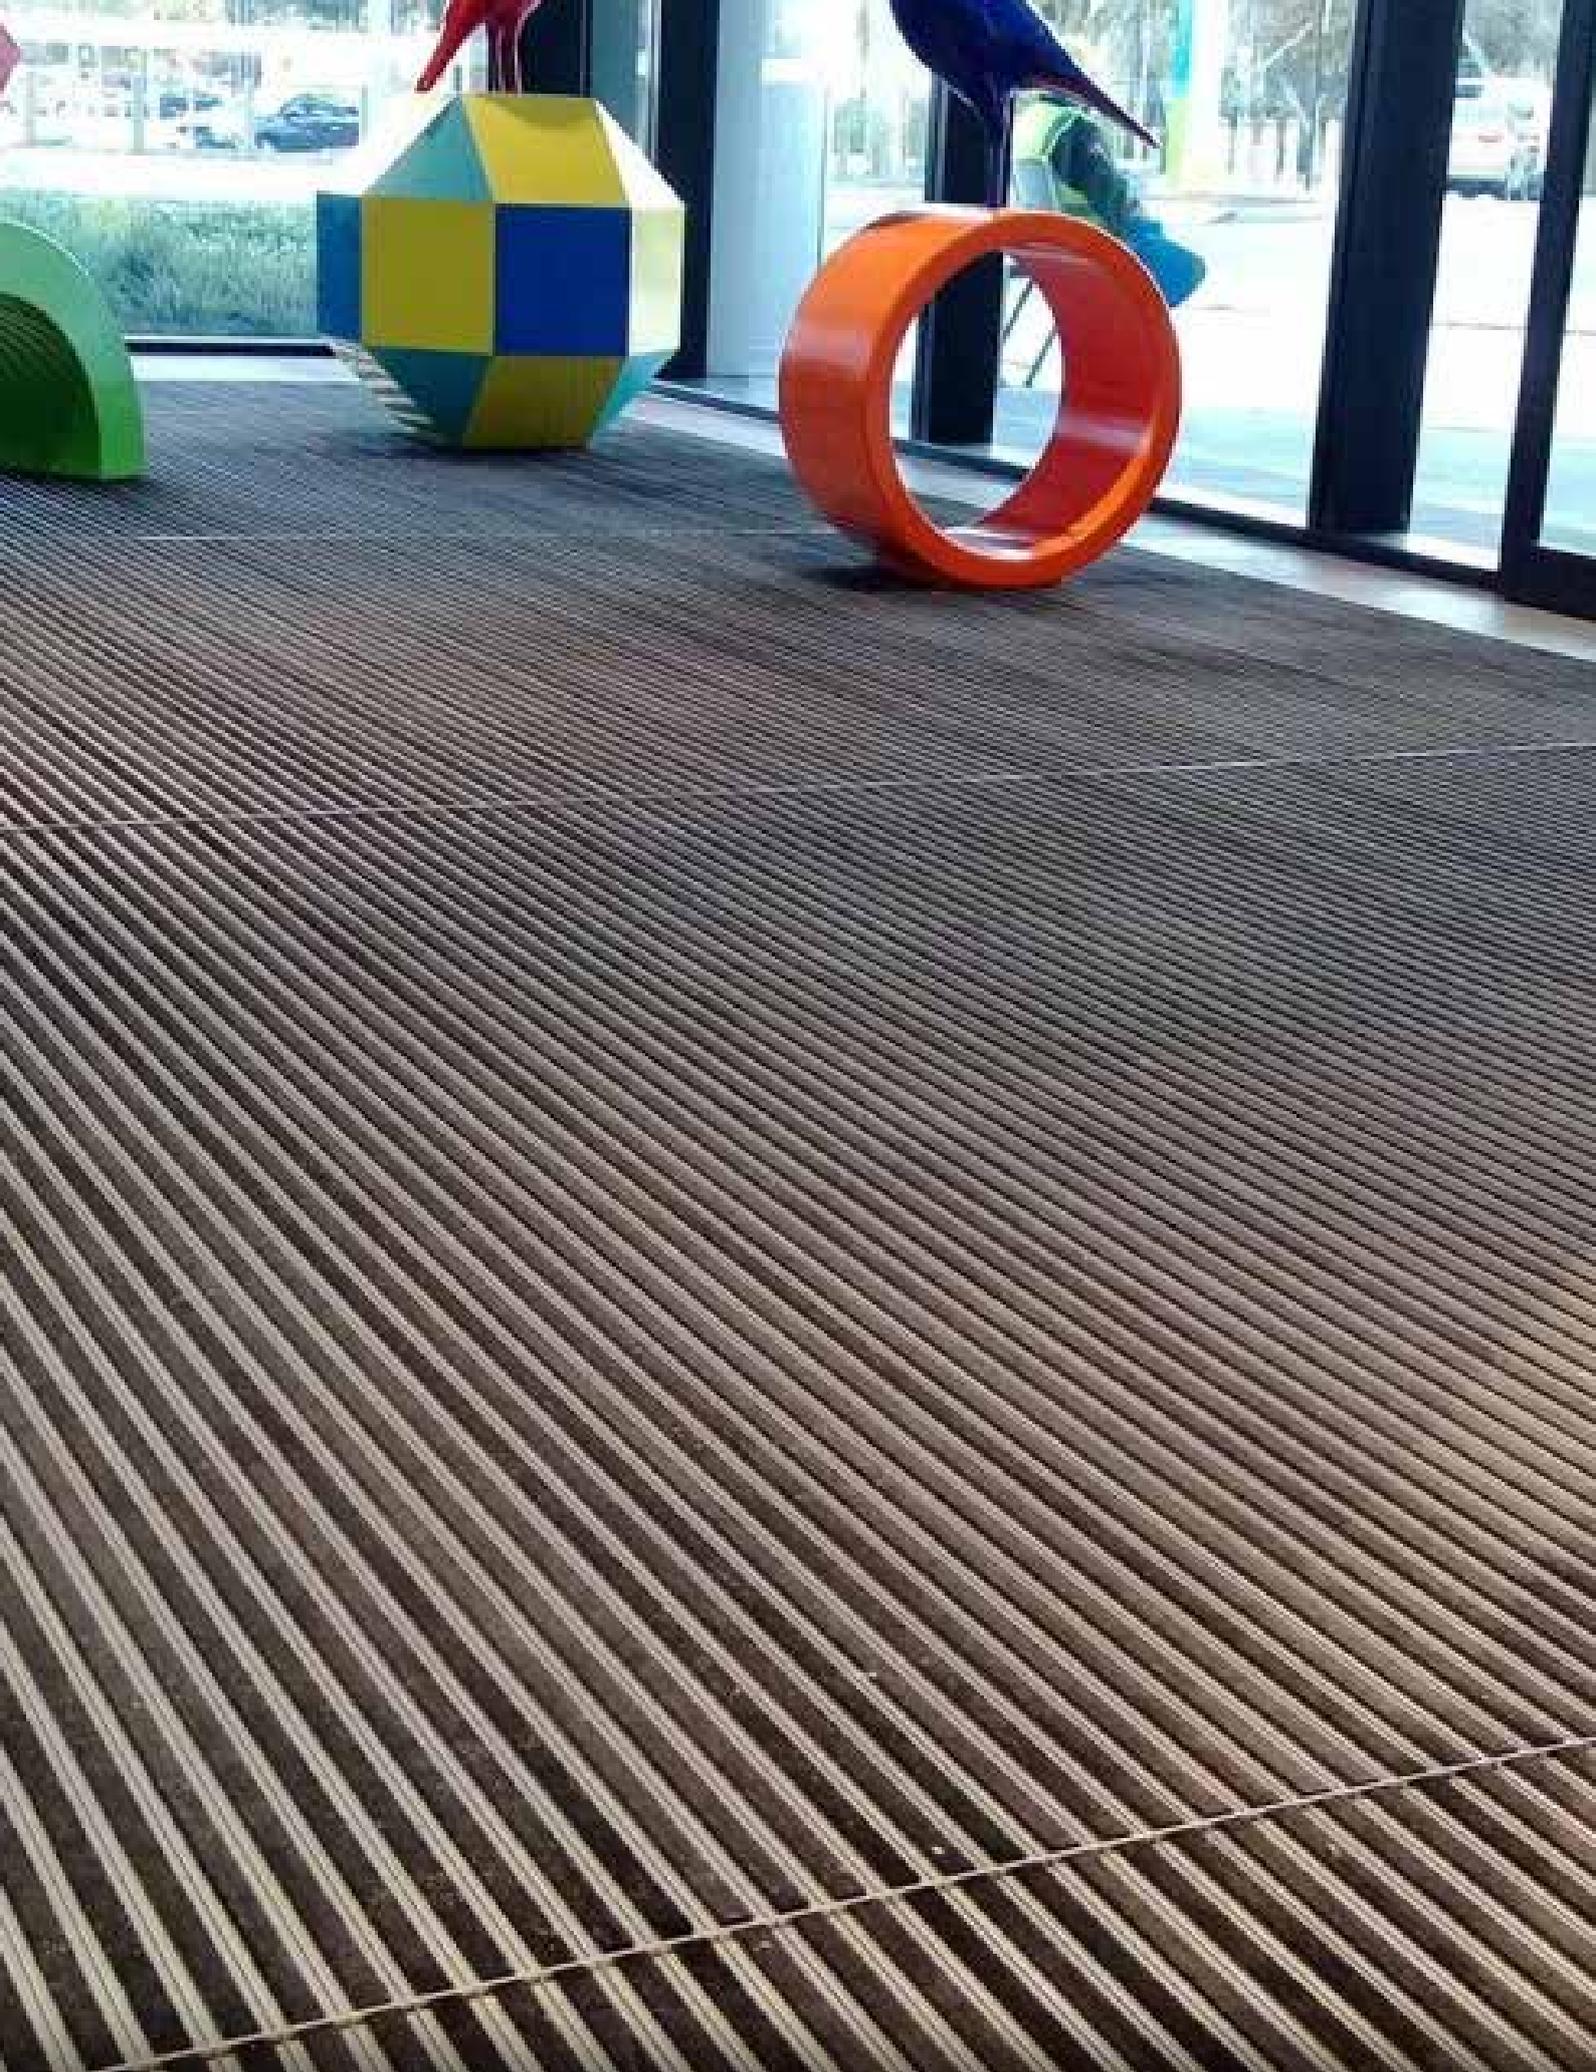

Built to withstand tough treatment as well as looking stylish, our commercial entrance mats can be matched to complement surrounding decor and construction materials. They are ideal for doorways, passageways and foyers in any commercial and public building.

INDOOR AND OUTDOOR SPORTS FLOORING

Spectrum Floors has supplied sports flooring for venues across Australia ranging from large stadiums to gymnasiums and studios. Our broad range of products mean we can offer alternatives which other suppliers find hard to match.

As a multi-generation family company we offer decades of experience while ensuring quality which will last the distance. We are suppliers for some of the world's most respected track and field surfaces that have been used at large sporting events around the world. We supplied and supervised the install of the 2018 Commonwealth Games on the Gold Coast Sportsflex Super X 720 running track.

SILVER KNIGHT VINYL FLOORING

Independent laboratory tests made to the ISO 21702 and ISO 27447 standards prove that the Silver Knight® surface destroys 99.99% within 24 hours of human CORONA VIRUS types as well as MRSA, VRE and ESBL bacteria.

Silver Knight® is much more than a common floor covering since this is the first photocatalytic self-disinfecting surface that is a perfect choice for any field of application in health. With the use of Silver Knight®, you can create the most hygienic environment, even in high-risk infection areas including hospitals caring for Corona Virus patients.

Main properties of the bacteria resistant vinyl flooring and wall covering:

- Excellent abrasion resistance
- Minimal residual indentation
- Extremely good stain-and chemical resistance
- Low maintenance
- Antibacterial and fungicidal
- Low VOC and improved indoor air quality

Spectrum Floors' vinyl floor coverings are premium, environmentally friendly products sourced from Europe. The vinyl products are perfect for high traffic commercial installations such as healthcare, education, hospitality, offices and retail.

These products come with 15 Year warranty.

Spectrum's premium vinyl products with Silver Knight® surfaces are available as:

- 2 mm Contract Vinyl
- 3.2 mm Cushioned Vinyl
- 1.5 mm Wall Cladding

Silver Knight® is a registered trademark of Graboplast.

STAIR NOSING AND TRIMS

Spectrum Floors offers stair nosings and trims for a broad range of coverings, both indoors and out. Our trims conform to Australian slip resistance standards and are LRV rated.

Our anti-slip aluminium extrusions have been designed with fine ripple trim finishes to ensure excellent slip resistance. Different styles of inserts can be provided to suit various applications. We offer stair nosings suitable for surfaces with carpets, concrete, timber, tiles or vinyl.
